STRONGEST SKILLS

- HTML & CSS - responsive layouts and styling
- EJS - server-side views and partials
- JavaScript - frontend and application logic
- Web design / interface layout
- Git / GitHub

PRACTICAL EXPERIENCE

Node.js, Express, Godot, GDScript, PostgreSQL/SQL, Railway, REST API.

LANGUAGES

- Polish - native
- English - B2 / professional working proficiency
- Russian - elementary

INTERESTS

Historical reenactment, game design, worldbuilding and RPGs, web design, computer hardware.

Daniel Abramek

Applied Computer Science Student ■ Web Development ■ Game Development

I am interested in web development, game development and design. I feel most confident with HTML/CSS and I am also developing my skills in EJS, JavaScript and Node.js. Outside of web development, I am building my own game, developing the Wekretia universe and taking part in historical reenactment. I also have experience as an activity leader, so I am comfortable working with people and leading groups. I enjoy combining a technical approach with creative thinking and learning through my own projects.

DEVELOPMENT AND PROJECTS

LeMoonz - Portfolio & Commissions Website

07.2026–present

Full-Stack Web Developer ■ HTML/CSS ■ JavaScript ■ Node.js ■ Express ■ EJS ■ Railway

I am building a portfolio and commissions website from scratch for an independent artist and animator. I am responsible for the layout and responsiveness, EJS views, backend and routing in Express, Git/GitHub and deployment. I develop the project iteratively based on direct client feedback.

VEK 0.4 / Wekretia

04.2026–present

Independent Game Developer ■ Godot ■ GDScript ■ Game Design

My own 2D RPG prototype set in an original world I have been developing for years. The current code includes a player controller, directional movement, animations, direction memory and the first attack and roll states. I combine programming with mechanics, level, narrative and worldbuilding design.

Padok FCI - Dobermann Kennel Website

12.2024–present

Web Developer ■ HTML ■ CSS ■ JavaScript ■ CMS

I develop and maintain the live website padok.typee.pl: updating content, improving layout and responsiveness, resolving ongoing issues and implementing changes agreed directly with the client.

EXPERIENCE

IT Intern - DevOps & AI

07.2026–08.2026

MAWAX Waldemar Bałdowski - internship, remote

Hands-on work with Git/GitHub, Docker, Podman, GitHub Actions and Kubernetes basics. In the AI part, I worked with FastAPI, OpenAI-compatible APIs, Ollama and vLLM; the final project combined an inference server, my own REST API and a simple HTML/JavaScript frontend.

Activity Leader

04.2022–07.2026, seasonal

Piwnikarnia Starotoruńska, Toruń

Leading workshops and groups of children, families and visitors; customer communication, public speaking, work organisation and working under time pressure.

IT Intern

09.2022

WMPnet, Toruń

Computer diagnostics, installation and configuration of operating systems and drivers, workstation setup and basic user support.

EDUCATION

Bydgoszcz University of Science and Technology

2024–2027 (expected)

Applied Computer Science, Bachelor of Engineering studies in progress

TEB Edukacja Technical School, Toruń

2019–2024

IT Technician - INF.02 and INF.03 qualifications

Technical Profile

WEB DEVELOPMENT

HTML5, CSS3, responsive design, EJS, JavaScript, Node.js, Express, REST API, CMS, Git/GitHub, Railway.

GAME DEVELOPMENT

Godot, GDScript, gameplay programming, Input Map, AnimatedSprite2D, CharacterBody2D, mechanics prototyping, game design, level design.

ADDITIONAL TECH

Basics or academic/project use: Java, C#, C/C++, Python, PHP, MySQL, Docker, Kubernetes, Podman, Arduino, FastAPI, OpenAI API and basic Linux.

WORK STYLE

- learning through real projects
- iterative improvement
- client communication and feedback
- troubleshooting and root-cause analysis
- project documentation

Skills, Projects and Qualifications

Technologies by practical level of use

PRACTICAL LEVEL

HTML & CSS

Layouts from scratch, responsive design, Flexbox/Grid, typography, visual components and improvements to existing sites.

EJS

Server-side views, partials and page composition in Express.

JavaScript

Frontend and Node.js use; UI interactions and application logic.

Node.js & Express

Routing, backend logic, configuration, integrations and server-side rendering.

Git / GitHub

Project workflow, commits, branches, pull requests and public repositories.

Godot & GDScript

Active game project: movement, animations, player states, Input Map and gameplay prototypes.

PostgreSQL / SQL

Relational database and query basics used in VEK 0.2.

Railway

Node.js deployment and environment configuration.

VEK 0.2 - BACKEND, DATABASE AND AI

VEK 0.2 - Discord Bot

[personal project](#) / [later university project](#)

Node.js ■ Discord.js ■ PostgreSQL ■ OpenAI API ■ Railway

Started as a bot for the VEK/Wekretia community and later adapted into a university project. It includes slash commands, economy, dice rolls and a text RPG campaign module: PostgreSQL history, LLM context, scene generation, JSON validation and reaction-based voting. I was the primary author and developer.

QUALIFICATIONS AND COURSES

IT Technician - INF.02 and INF.03

2024

TEB Edukacja Toruń

INF.02: computer systems, peripherals, networking basics and diagnostics. INF.03: websites and databases - HTML, CSS, JavaScript, SQL/MySQL, publishing and maintenance.

Arduino Programming

2023

TEB Edukacja Toruń - 60 hours

Arduino IDE, C/C++ basics, sensors, LEDs, motors and simple circuits.

C++

2022

TEB Edukacja Toruń - 30 hours

Language basics, control flow, loops, functions, simple console apps and an introduction to OOP.
